A Riddle for You

What three things together make one but when conjoined make 90?

A. The triangle, or delta, is the symbol of Deity for this reason. In geometry a single line cannot represent a perfect figure; neither can two lines; three lines, however, constitute the triangle or first perfect and demonstrable figure. Hence this figure symbolizes the Eternal God, infinitely perfect in his nature. But the triangle properly refers to God only in his quality as an Eternal Being, its three sides representing the Past, the Present, and the Future. ... Gnostic trinity of Manes consisted of one God and two principles, one of good and the other of evil. The Indian trinity, symbolized also by the triangle, consisted of Brahma, Siva, and Vishnu, the Creator, Preserver, and Destroyer, represented by Earth, Water, and Air. This symbolism of the Eternal God by the triangle is the reason why a trinitarian scheme has been so prevalent in all religions--the three sides naturally suggesting the three divisions of the Godhead. But in the Pagan and Oriental religions this trinity was nothing else but a tritheism. Source: <http://www.sacred-texts.com/index.htm>

Just a Thought

It appears that even though the logos are similar, there is no proof that *Star Trek*'s creator, Gene Roddenberry, was a Mason, or had any Masonic links. Too bad: it would have made a good story.
